Making an entrance

# COMPANY

Introducing Innovate electric gates - the modern solution to safeguard your property like never before. Innovate was formed in 2008 and is a family run company, with a combined experience of over 40 years in the security and automation sector.

Say goodbye to traditional gates and embrace innovation, style, security, and convenience. Our electric gates are designed to provide unparalleled protection for your property, ensuring a safe haven for you and your loved ones.

Crafted with precision and advanced technology, these gates exude elegance and sophistication, elevating the aesthetics of your home or office. Our sleek and modern designs seamlessly blend into any architectural style, making a bold statement while safeguarding your valuable assets.

Unleash the power of automation as you effortlessly control these gates with just a touch of a button. No more struggling with heavy manual gates or worrying about leaving them open by mistake. Our electric gates operate smoothly and silently, ensuring a hassle-free experience every time.

Investing in electric gates not only secures your property, but also adds value to your investment. If you are looking to give your property some additional curb appeal, then look no further.

# QUALITY

Indulge in the exclusivity of our electric gate installations, meticulously crafted by esteemed members of the renowned Guild of Master Craftsmen.

Elevating the concept of excellence to new heights, our gates epitomize the perfect fusion of artistry and functionality. With an unwavering commitment to perfection, we relentlessly seek out the finest materials and cutting-edge technologies.

As proud members of the Guild of Master Craftsmen, we invite you to experience the epitome of craftsmanship, delivering you the most exceptional gates available on the market.

# DESIGN

## GATE DESIGNS

Exceptional aesthetics and attention to detail can make a design truly stand out from the crowd.

Not only do we offer a variety of the most popular gate designs on the market, but we can also match any particular gate style or design you may have in mind.

## PRECISION DETAIL

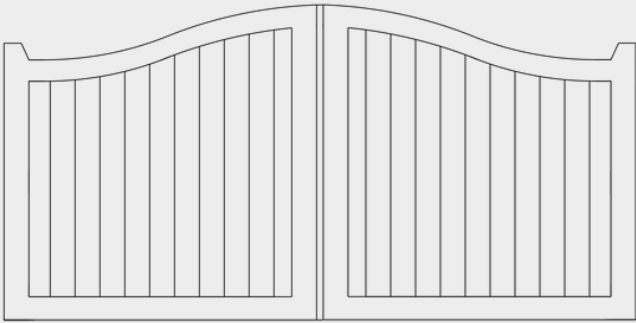

We offer state of the art CAD (computer aided design) drawings with every project, enabling you to see exactly how your gate will look.

These drawing also ensure that the whole installation runs smoothly and without issue.

# INSTALLATION

## THE PROCESS

- initial site visit with client to ensure all factors are discussed to ensure correct specification and smooth installation.
- First phase of the installation to prepare and complete groundwork's, install posts, track and ducts.
- Electrical Wiring: Set up the electrical components, including wiring for the gate opener, safety sensors, intercom systems, and any other automation features.
- Next phase of installation is to install the gate and gate hardware.
- Testing: Thoroughly test the gate's operation, including its opening and closing mechanisms, safety features, and all automation components.
- User Training: demonstrate to the client how to operate and maintain the gate, including troubleshooting common issues.
- Maintenance Plan: Advise the owner on a maintenance schedule to keep the gate and its components in good working condition.
- Compliance: Ensure that the installation complies with the safety regulations.
